CONTENTS

The system.

Revision 04 establishes RE5 as the primary brand with Bald Research as a small publisher credit.

Replaces the bracket wordmark with a type-only mark. Introduces a new monogram, locks the hand-drawn 育 seal, and adds Hairck as content vocabulary.

09	育 seal Hand-drawn cultural anchor	PAGE 11

RE5 is the brand.

The architecture

RE5 is the primary brand — used across all customer-facing surfaces: Masterclass, books, products, member portal, social, and packaging. **Bald Research appears only as a small publisher credit** on book copyright pages, authority publications, and editorial mastheads. There is no two-tier separation.

PRIMARY BRAND

RE5 — appears at full scale across every consumer-facing surface.

PUBLISHER CREDIT

"Published by Bald Research" — small, monospace, footer-only on books and authority papers.

The positioning

A science-driven hair restoration company built on the RE5 Hair Intelligence System. Operating at the intersection of **Eastern botanical intelligence and Western clinical precision**. Genderless, clinical-meets-botanical, explicitly NOT in the men's-grooming dark-mode category.

Reference brands: Function Health, Maude, Necessaire, The Nue Co. Lab-paper aesthetic with warmth.

The voice

First-person, direct, scientific but readable. **Mechanism-first-then-analogy**. Talks like a knowledgeable friend teaching a friend. No hype, no exaggerated claims, no generic wellness language. Uses Eastern script alongside ingredient names (인삼, 女贞子, 白芍, 靈芝, अश्वगन्धा) — a deliberate brand signature, not decoration.

02 · TAGLINES

Three lines. Three jobs.

Each tagline does a specific job in the system. The primary line carries the brand point of view. The secondary line provides rotation. The system definition explains the framework when context calls for it.

PRIMARY · BRAND POINT OF VIEW

Less noise. More follicles.

SECONDARY · ROTATION

Stop guessing. Start growing.

SYSTEM DEFINITION · ABOUT / RE5 PAGES

Ancient roots. Modern science. One system.

Application rules

PRIMARY · LESS NOISE. MORE FOLLICLES.

Default brand line. Used in social, email signatures, footers, packaging, anywhere the brand needs a single line.

SECONDARY · STOP GUESSING. START GROWING.

Rotation line. Used in performance marketing, ads, urgency contexts, conversion-focused surfaces.

SYSTEM · ANCIENT ROOTS. MODERN SCIENCE. ONE SYSTEM.

Used on About page, RE5 framework page, system explainers — anywhere the brand needs to define what RE5 is.

Words the brand owns.

Two pieces of content vocabulary that extend the brand into specific contexts: the book/product positioning line, and a tactical word for content series and chapters.

The book + product positioning

BOOK TITLE + SUBTITLE

Bio-Hacking Hair Regrowth

ANCIENT ROOTS, MODERN HACKS

The original book title stays intact — already searchable, already familiar. The East-West signal lives in the subtitle, where philosophy belongs on a book cover. *"Modern Hacks"* deliberately keeps the bio-hacker register; *"Ancient Roots"* carries the East-West.

Hairck — the tactical word

Hair + *hack* fused into a brandable word. Sounds the same as "hack." Reads as distinct on the page. Used for content series, chapter framing, and tactical micro-protocols. **Hairck never appears at the same scale or weight as RE5 — it is vocabulary, not branding.**

DUAL-USE TYPOGRAPHIC TREATMENT

HAIRCK · 023

B · MONOSPACE · GRAPHIC USE

All-caps IBM Plex Mono with numbering. Lives in the system data register — protocol numbers, eyebrow labels, social tile headers, chapter subtitles. **Default for any graphic placement.**

Today's Hairck

C · TITLE CASE · BODY COPY

Sentence-style. Used in body copy, captions, conversational references. *"Most members find a Hairck they swear by within the first month."* Never as a logo.

◆ THE RULE

Hairck is content vocabulary, not a sub-brand. No formal lockup, no logo, no separate visual identity. It appears wherever the brand wants to be playful and tactical — chapter names ("The Hairck Files"), social series (#Hairck), masterclass module subtitles ("Module 8: The Hairck Library"), occasional merch. RE5 always remains the dominant mark.

04 · COLOUR SYSTEM

Five colours.

Lab Paper and Carbon Ink carry 90% of the system. Saffron is the colour that pops. Celadon Teal is a system accent only — used sparingly for system/protocol callouts, never as a primary surface.

				
CANVAS	TEXT	ACTION	SYSTEM	META
Lab Paper #FAFAF7 RGB 250/250/247 PRIMARY SURFACE	Carbon Ink #1A1A1A RGB 26/26/26 PRIMARY TYPE	Saffron #E8893D RGB 232/137/61 POP / CTA	Celadon Teal #2F5F6B RGB 47/95/107 SYSTEM ACCENT	Stone Gray #8A8578 RGB 138/133/120 META / LABELS

Semantic rules

SAFFRON #E8893D — THE COLOUR THAT POPS

Primary CTAs, key accents, the "5" in RE5, pricing emphasis, urgency. The dominant accent colour.

CELADON TEAL #2F5F6B — SYSTEM ACCENT ONLY

Used sparingly for system/protocol callouts, eyebrow labels on system pages, table headers, secondary indicators.

Never a primary surface, never an alternative to saffron.

PAPER + INK — THE WORKHORSES

Carry 90% of the system. Warm, clinical, readable. All bodies of text and primary surfaces.

05 · GRADIENT SYSTEM

Two gradients. Hero-only.

Both gradients begin in Celadon Teal but resolve to different second colours. **Used rarely** — gradients are hero-only surfaces, never default backgrounds.

GRADIENT 01 · CELADON → DEEP TEAL**Conversion gradient.**

#2F5F6B → #1F3F48 · 135°

Use on: Hero surfaces with a saffron CTA — homepage hero, Masterclass page, pricing sections, member dashboard banner. Stays entirely in the celadon family for tonal harmony, lets saffron pop hardest. Restrained, clinical, atmospheric.

GRADIENT 02 · CELADON → GOLD AMBER**Atmosphere gradient.**

#2F5F6B → #F5A455 · 135°

Use on: Brand atmosphere surfaces with no CTA — book covers, East-West storytelling sections, standalone hero visuals. Sunset-warm, golden-hour register. **Saffron CTAs do not work over this gradient** — atmosphere only.

◆ THE RULE

If the surface contains a saffron CTA, use Gradient 01 (Deep Teal). If the surface is pure brand atmosphere with no CTA inside the gradient field, use Gradient 02 (Gold Amber). Saffron disappears against gold amber — keep them apart inside the same canvas.

FREQUENCY

Hero moments only. If used on every card, gradients lose their weight. Treat as a special layer, not a default surface.

DIRECTION

Always 135° (top-left to bottom-right). Consistency across all gradient applications.

TYPE OVER GRADIENT

Always white #FAFAF7 type. Never ink. Saffron stays saffron when used inside a gradient surface (Gradient 01 only).

06 · TYPOGRAPHY

Two fonts.

DISPLAY / BODY · NUNITO SANS

Hair loss isn't one problem.

It's eight. Most protocols treat one cause and expect the other seven to disappear.

AaBbCc · 0123456789 · 300 · 400 · 500 · 600 · 700 · 800

DATA / LABELS · IBM PLEX MONO

FERRITIN > 70 NG/ML · OPTIMAL

RE5 · \$38 LAUNCH · FIRST 500 MEMBERS

HAIRCK · 023

AaBbCc · 0123456789 · 400 · 500 · 600

NUNITO SANS

All editorial, body, and display copy. Warm humanist sans — modern but never tech-bro. Genderless and clinical-readable.

IBM PLEX MONO

Data, metadata, eyebrow labels, button text, and any "system speaking" voice — including Hairck graphic use. Adds an editorial-research register.

07 · WORDMARK

Type-only RE5.

A type-only wordmark — carbon "RE" with saffron "5". **No bracket. No frame.** The brand colour is built into the character itself, so the wordmark is its own anchor at every scale. Sits in the same lane as Aesop, Maude, Necessaire, Function Health.

01 · ON PAPER · DEFAULT

The wordmark "RE5" is displayed in a bold, sans-serif typeface. The letters "RE" are in a dark carbon color, and the "5" is in a saffron color. The wordmark is centered within a light gray rectangular box.

Construction: Helvetica Neue Black / Nunito Sans 800 weight. Letter-spacing –1pt. The "5" is saffron #E8893D; "RE" is carbon ink #1A1A1A. Used at every scale across web, print, and product.

02 · ON INK

The wordmark "RE5" is displayed in a bold, sans-serif typeface. The letters "RE" are in a light paper-white color, and the "5" is in a saffron color. The wordmark is centered within a dark gray rectangular box.

Same construction inverted. "RE" becomes paper-white #FAFAF7; the saffron "5" stays saffron. Saffron is the only constant anchor colour across the entire system.

SCALE RANGE

From 96pt (book covers, hero) down to 9pt (footers, navigation). Always type-only — never replace the saffron "5" with another colour.

CLEARSPACE

Minimum clearspace = height of "5" character on all four sides. Maintained at every scale.

Five circles. Five phases.

A horizontal phase sequence: five equal-sized circles in equal spacing, each shape representing one of the RE5 phases. The saffron filled circle on the right marks Retain — the lasting outcome.

Anatomy

USE

Footers, social tile watermarks, book spines, chapter dividers, system page section breaks. Lives in the negative space — never compete with the wordmark or 育 seal.

CONSTRUCTION

Five circles, radius 6, equal 28-unit spacing. Side-dot radius 1.5, positioned at +7,+7 from dotted circle centre. ViewBox 124×24.

The cultural anchor.

育 (yù) — "to nurture, cultivate, grow." Hand-brushed Ma Shan Zheng calligraphy in saffron, inside a thin saffron rounded-rectangle frame with hand-drawn imperfections. Used standalone — never as a unit with the wordmark.

Scale range

PLACEMENT

Bottom-right corner of book covers. Top-right corner of footer bars. End of chapter sign-offs. Always opposite the wordmark or author name — never paired into a single lockup.

CONSTRUCTION

Ma Shan Zheng character in saffron. Frame is a hand-drawn rounded rectangle with slight imperfections (asymmetric corners, varying line weight). Tight inner spacing — the character nearly fills the frame.

10 · FOLLICLE DIAGRAM

The signature visual.

A hand-drawn line-art cross-section of a hair follicle. Used recurrently across hero sections, book covers, educational content, and social. Every iconic brand has one defining visual beyond its logo.

For RE5, it's the follicle.

Anatomy

- Vertical hair shaft (stops at inner wall)
- Arrector pili muscle (dashed line)
- Inner root sheath (concentric inner)
- Dermal papilla (small inner ellipse)
- Sebaceous gland (small ellipse, branching)
- Outer follicle wall (encapsulating bottle shape)
- Hair bulb (rounded base)
- Two outward-curving dashed root lines

STYLE RULES

Single-weight outline (1.4pt main / 1.2pt dashes / 1.1pt inner / 1pt root curves). Opacity 0.65–0.7 for soft hand-drawn quality. Monochrome — only stroke colour changes per surface (paper, ink, saffron).

11 · TEXTURE SYSTEM

Two layers.

A minimal, restrained texture profile. Two layers, each with a defined job. **No heritage layer for now** — the brand stays clean.

LAYER 01 · LAB PAPER GRAIN

RE5 FRAMEWORK

Eight drivers.
One system.

Hair loss is never one cause — always an overlap.

Universal base. Subtle radial blotches mimicking archival lab notebook paper. The noise is so subtle you only register it subliminally — but it softens the digital flatness and adds organic warmth. Applied to every paper-based surface.

LAYER 02 · DASHED MARGIN + COLOURED HEADER

PROTOCOL · PS-04

RE5 Men's Hybrid v2.3

INTERVENTION	M	W	F
Finasteride 1mg	✓	✓	✓
Saw palmetto	—	✓	—
Topical serum	✓	✓	✓

Data layer. Single dashed celadon vertical line down the left margin (notebook-style guidance) plus a solid celadon header row in tables. No background grid. The base grain still applies. Used for protocol sheets, supplement tables, blood test ranges.

Application rules

LAYER 01 · UNIVERSAL

Every paper-based surface gets the grain. Web backgrounds, document pages, book interiors, social tiles on paper. No exceptions.

LAYER 02 · DATA-ONLY

Used only on data-heavy pages: protocol sheets, master supplement table, blood test ranges, comparison tables, member dashboard data views.

DARK SURFACES

No texture on dark or gradient surfaces. Grain is paper-only; gradient surfaces carry their own atmospheric weight.

12 · APPLICATION

How it lives.

Three example applications showing the system at work — Masterclass book cover (Gradient 02 atmosphere), Quick-Start cover (paper + grain), and a website hero (Gradient 01 + saffron CTA).

RE5 MASTERCLASS COVER

Gradient 02 (Celadon → Gold Amber). RE5 wordmark dominant. 育 seal in paper-white at bottom-right corner.

RE5 QUICK-START COVER

Lab paper + Layer 01 grain. Same RE5 wordmark, 育 seal in saffron, "Published by Bald Research" implied in book copyright page.

Website hero · Gradient 01 with saffron CTA

13 · SYSTEM SUMMARY

Everything locked.

Brand identity v4 — locked decisions in one place. Use this page as the reference card for all downstream work.

Brand architecture

RE5 PRIMARY

RE5 is the brand. **Bald Research** appears only as a small publisher credit on books and authority publications. No two-tier separation.

Taglines

3 LINES

Primary: Less noise. More follicles. **Secondary:** Stop guessing. Start growing. **System definition:** Ancient roots. Modern science. One system.

Content vocabulary

BOOK + HAIRCK

Bio-Hacking Hair Regrowth: Ancient Roots, Modern Hacks (book title + subtitle). **Hairck** — content sub-word, dual-use: B monospace headers / C title case body.

Colour system

5 COLOURS

Lab Paper **#FAFAF7** + Carbon Ink **#1A1A1A** = primary backgrounds. Saffron **#E8893D** = pop / CTAs. Celadon Teal **#2F5F6B** = system accent only. Stone **#8A8578** = meta.

Gradients

2 · HERO-ONLY

01 · Celadon → Deep Teal (#2F5F6B → #1F3F48) for surfaces with saffron CTA. **02 · Celadon → Gold Amber** (#2F5F6B → #F5A455) for atmosphere only. Always 135°.

Typography

2 FONTS

Nunito Sans for editorial, body, display. **IBM Plex Mono** for data, labels, button text, eyebrow tags, Hairck graphic use.

Wordmark

TYPE-ONLY

Carbon "RE" + saffron "5". No bracket, no frame. Letter-spacing –1pt. Saffron "5" stays saffron in every context.

Monogram

5 EQUAL CIRCLES

Filled / half-and-half / outline / dotted-with-side-dot / saffron filled. Equal size, equal 28-unit spacing. ViewBox 124×24.

育
seal

CULTURAL ANCHOR

Hand-brushed Ma Shan Zheng 育 in saffron, inside a thin saffron rounded-rectangle frame with hand-drawn imperfections. Standalone use. Saffron on light, saffron or paper-white on dark.

Follicle
diagram

SIGNATURE VISUAL

Hand-drawn line-art cross-section. Outer wall encapsulating bulb. Outward-curving dashed root lines. Used recurrently across hero, books, education, social.

Texture
system

2 LAYERS

Layer 01 · Lab Paper Grain — universal on every paper surface. Layer 02 · Dashed Margin + Coloured Header — data-heavy pages only.
